RE: Status of Aggrellite 1 Mine, PRO/041/013, Sevier
County, Utah

A telephone conversation was held with Mr. Park on November 31, 1985 regarding the permitting status of the Aggrellite 1 Mine. He stated that he was pursuing funding for the project and had no idea when he would get this completed, therefore, had not responded to our July 31, 1985 letter. I informed him that he should notify the Division of his intentions regarding the pursuit of permitting his operations. He said he would be glad to do this.
